Health and wellness has a new address

World's largest integrative wellness
centre to open in Macau

maloclinic & spa

With compliments of MALO CLINIC Spa

Asia's new era of medical excellence

MALO CLINIC Spa Macau is set to offer an integrative, all-inclusive approach to complete wellness

Dr. Paulo Malo - Founder

MACAU HAS BLENDED the richest experiences of East and West for nearly 500 years, so it's little surprise that the city was chosen as the first location in Asia for the new MALO CLINIC Spa.

With its Chinese heritage and Portuguese influence, Macau has charmed visitors, entertained them and is going to offer them world-class medical treatments and wellness services with the reassurance of an internationally recognized health-care group.

Owned and managed by Lisboa-based MALO CLINIC Health & Wellness Group, the MALO CLINIC Spa is planning to roll out a comprehensive array of world-class services by 2010, covering seven professional areas – oral rehabilitation & dental cosmetic, preventive & curative medical care, spa, total beauty, cosmetic anti-ageing, leisure & fitness, and life long wellness. It is a brand new concept, and set to be the world's largest facility of its kind.

Treatments are developed and delivered by a team of the highest trained doctors and healthcare professionals in a first class, healthy and comfortable environment.

When fully opened by 2010,

The 85,000 square-foot MALO CLINIC Spa Macau is located on the fifth floor of The Venetian® Macao-Resort-Hotel

the MALO CLINIC Spa will cover 85,000 square feet, providing a spacious environment for its cross-disciplinary team of medical doctors, dentists and wellness therapists recruited from across Asia, Europe and America. In a dedicated space, on the fifth floor of The Venetian® Macao-Resort-Hotel, the MALO CLINIC Spa will have distinct areas for high-end medical and diagnostic equipment, including six operating theatres, at one end of the spectrum, to 58 elegant, luxurious spa suites at the other. To complete the all-round, all-over emphasis on health and wellness, the complex will include a stylish beauty lab. The advanced medical facility and technology, together with the extensive MICE facilities at The Venetian® Macao, will set an ideal location for successful medical and dental events.

Founded by world renowned dental surgeon Dr. Paulo Malo, who is credited for pioneering the revolutionary surgical technique All-on-4 and the fixed prosthesis MALO CLINIC Bridge, it is no surprise that the MALO CLINIC Spa features the latest innovations in oral rehabilitation and cosmetic dentistry, including Malo's own implantology technology.

While offering the specialist dental treatment that Dr. Malo has pioneered for several decades, the MALO CLINIC Spa will provide a vast range of other healthcare services.

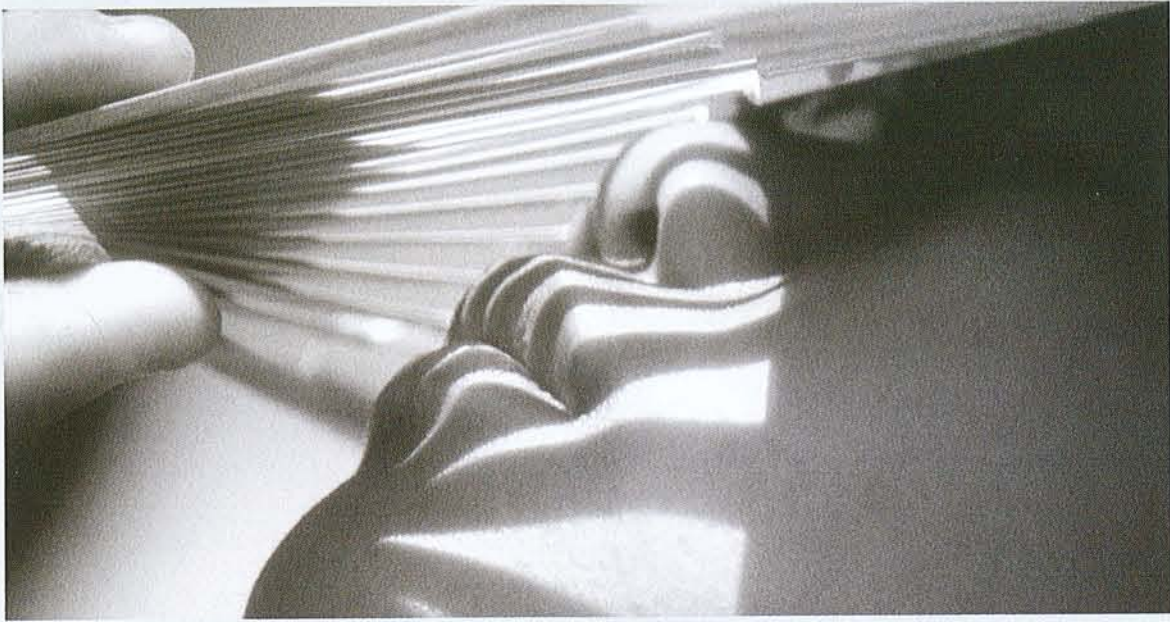

The Malo philosophy is to focus on prevention. By targeting and identifying potential diseases and health risks before they can develop, it's not only valuable time and money that is saved.

True to its core belief in complete wellness, the MALO CLINIC Spa's signature health screening programmes, Total Body Assessments, will combine Eastern and Western diagnostic procedures, and dental health. This essential, one-stop examination process will provide guests with the reassurance that they can actively take control over their own health and lifestyle. Expert advice and consultation will be built into the programme and, if further treatments are necessary, the MALO CLINIC Spa will direct the guest to the most suitable next point of treatment.

Guests will undergo intensive examinations and tests for the common ailments of our hectic modern lives, such as diabetes, cancer and heart disease. But they will also undergo eye-sight tests, assessments on obesity, and will receive sound advice on shaping diet and lifestyle to prolong and improve life. Therapy and counselling will also be available for those who wish to address their dependence on nicotine or alcohol.

Utilizing the latest in Western methods, the MALO CLINIC Spa will also deliver exciting new trends in Traditional Chinese Medicine, practises that have proven effective over thousands of years and based on a sound scientific footing.

Bring together the best of both medical cultures, the MALO CLINIC Spa will offer a unique level of expertise in allowing guests to choose treatments that they are most comfortable with. The MALO CLINIC Spa, when in full operation in 2010, will signal a new stage in Asian wellness excellence. ■

A spa and so much more

Rejuvenation, relaxation and revitalisation under one roof

ASIA HAS NEVER SEEN A complex quite like the MALO CLINIC Spa. The ability to integrate advanced clinical techniques with wellness and spa treatments is a truly unique feature.

The Spa zone is currently open, bringing healing and wellness therapies to new heights through a range of experiences – from purely indulgent treatments to therapeutic solutions that combine medical expertise. Signature treatments include Tranquility Aromatic Ritual, Uplifting Citrus and Relaxing Lavender. In particular, guests are able to take advantage of a complimentary automated body assessment Vital Body Health Screening to evaluate their basic health conditions.

Aside from world-class treatments, the MALO CLINIC Spa's 58 spa treatment suites offer couple, deluxe, super deluxe and group treatment suites, to allow guests to bring friends and family members to enjoy the treatments.

There are also a number of hydro suites with Vichy showers, dry floatation, hydro tubs and salt floatation experience.

Spa bathing facilities featuring steam showers, saunas, hammams, and vitality pools set at different temperatures, provide an invigorating experience.

Personal grooming is also a core area of expertise of the MALO CLINIC Spa, with manicure and pedicure services in addition to a chic beauty lab catering to both male and female guests.

Coming in 2010 will be one of the highlights, Total Body Treatments, which are half to full day programmes designed for guests to enjoy perfect synergy between clinical, traditional, dental and healing therapies in one spa experience. A first-class dining experience fusing the best of the West and the East in a delicious but nutritious and healthy way will also be included.

The Malo philosophy is about the beauty of health. Aside from full body and therapeutic massage from trained therapists, those who wish to consider cosmetic procedures will find experienced specialists to advise them and plan their treatments.

The MALO CLINIC Spa will be the first choice for those looking for a complete health and wellness package. ■
